

IECC Exhibition and Convention Center, New Delhi, India

Redevelopment and modernization go hand in hand in this India Trade Promotion Organization, ITPO project.

The exhibition and convention center is located 18 km from the international airport and only 2.5 km from the main business area of Connaught Place. The redevelopment of the 50-year-old exhibition center, Pragati Maidan Complex, is about to finish. Even though the old complex was India's largest exhibition center, the introduction of the new and modern world class Integrated-Exhibition-cum-Convention-Centre, IECC, will be even bigger. It will include:

- A convention center with max. 7.700 seats, a 3.000-seat amphitheater, a business center, 600- and 900-seats auditoriums and 26 meeting rooms. A GRIHA 4 certified Green Building of 53.000 m².
- 11 exhibition halls covering 300.000 m² based on a two-phase redevelopment strategy. Phase 1 will include new 7 exhibition halls. Exhibition halls will be GRIHA 3 Green Building rated.
- Plenty of underground parking facilities and good infrastructure connectivity to encourage use of public transportation, but also allow roads to de-congest fast.
- 3 open-air amphitheaters for live performances and cultural shows.
- And in the future also a high-level hotel.

Application

Due to the fully air-conditioned convention center and a design temperature of 20°C ±1°C, the expansive glass lobby will allow complete view of the surround-

ing areas without compromising the indoor climate. Also, the exhibition halls will include same level of sophisticated air-condition. The well-proven FlowCon PICVs mounted on all AHUs to secure proper indoor temperature and Dynamic Balancing valves for primary system balancing.

Project Configuration:

Project name: Integrated Exhibition cum Convention Centre (IECC)

Client: India Trade Promotion Organization, ITPO

Project management: NBCC (INDIA) Ltd.

Architect: M/s Arcop

Consultant: Meinhardt Consultant

Contractor: APC Engineers & Consultants (P) Ltd.

Valve model and quantity:

PICVs and Dynamic Balancing:

154 x FlowCon Green and FlowCon SM

18 x FlowCon Wafer, DN300-500

Application: New buildings

FlowCon distributor: Ensavior

Date of inauguration:

March 2022 - soft opening Q2/2021
